Appl. No: 09/467,231

Amdt. Dated: December 9, 2003

Reply to Office Action of: September 17, 2003

## **Amendments to the Specification**:

Please replace the title of the application with the following amended title:

## --DATA PROCESSING DEVICE AND METHOD FOR SELECTING MEDIA SEGMENTS ON THE BASIS OF A SCORE--

Please replace the paragraph beginning on page 35, line 10 and ending on page 36, line 1, which starts with "The context description data having...", with the following amended paragraph:

A

--The context description data having such a configuration may be expressed in a computer through use of, e.g., Extensible Markup Language (XML). XML is a data description language whose standardization is pursued by the World Wide Web Consortium. Recommendations Ver. 1.0 were submitted on February 10, 1998. Specifications of XML Ver. 1.0 can be acquired from <a href="http://www.w3.org/TR/1998/REC-xml-19980210">http://www.w3.org/TR/1998/REC-xml-19980210</a>. Figs. 3 through 9 show on example of Document Type Definition (DTD) used for describing the context description data according to the present embodiment through use of XML, and one example of context description data described through use of DTD. Figs. 10 through 19 show one example of context description data prepared by addition of representative data (dominant-data) of a media segment, such as a representative image (i.e., video data) and a keyword (audio data), to the context description data shown in Figs. 3 through 9, and DTD used for describing the context description data through use of XML.--
